

# MULTIFUNCTION TRESTLE

Tired of having so many trestles and supports in your bodyshop?

**THE MULTIFUNCTION TRESTLE THAT ADJUSTS  
TO ALL YOUR NEEDS !**

**ADAPTABLE**

**EASY TO USE**

**OPTIMIZED WORKING CONDITIONS**

**SOLID**

# MULTIFUNCTION TRESTLE

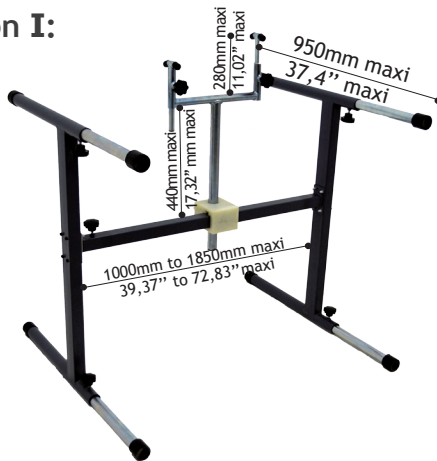

**Adaptable:** thanks to its adjustable feet and its two-point central support, the multifunction trestle is adaptable and polyvalent. It easily adapts to all different sizes of body and rocker panels, bumpers and windscreens.

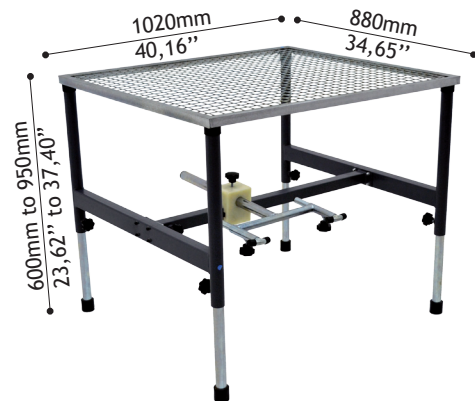

2 positions :

- Position I:

The fully telescopic central bar equipped with two independent adjustable points perfectly maintains the parts form (bumpers, rocker panels ...). This is especially important for an operation that involves pressure (sanding) or heating (IR drying).

- Position H:

A perfect height adjustment to facilitate any sanding, drilling or painting operations without hurting your back. The table surface is equipped with an open grid for painting and sanding operations.

**Easy to use:** handling and settings are really simple.

**Solid:** made of galvanized steel, covered with an epoxy paint, the multifunction trestle is robust and maintenance free.

**Maximum weight:** 50kg

**Optimized working conditions:** the openwork table is adjustable in height to allow the best comfort to the user.

**Microcellular, anti-slip foam blocks** allow to work contoured and fragile parts safely.
